

Services

One aspect that makes Coastal Fog Productions unique, is our ability to blend and unify design between various media. We have worked with clients both large and small to create a distinct and common appearance among their web site, brochures, trade show graphics, video presentations, multimedia CD-ROMs, internal presentations, illustrations, and more. We leverage your design for more than one product, and we strive to make our designs work for all of your communication needs.

Our facility is equipped with the latest in computers, software and A/V equipment including Macintosh computers, digital video and still cameras, Final Cut Pro editing bays and an Audio Production Facility with Steinberg Nuendo at its heart, capable of everything from a simple voiceover to full production mixing and mastering.

Some of our services include:

- Graphic Design
- Website Design and Development and Hosting
- Video Production
- DVD Development
- Streaming Media
- Audio Production
- Multimedia
- FLASH
- Training
- and much more...

If there is something you don't see in our list, chances are we do it but just haven't listed it. Give us a call!
