

Web Design & Development

Coastal Fog Productions focuses on providing the expertise, services and support needed to conceive, build and maintain your website.

Utilizing the latest programming technologies and cutting edge media software, Coastal Fog can design a site that is as functional as it is engaging. We do everything from Cold Fusion, PERL, ASP and PHP on the backend to FLASH, Quicktime and Real Media on the front. Best of all we can do it all under one roof, becoming your end to end solution provider.
