

## Video Production

Video can be a powerful enhancement to a board, sales, or training presentation, and can add impact to any website. Video is also a highly versatile marketing tool that can increase sales, enhance recruiting, strengthen corporate branding or raise capital.

Some of our services include:

- Full Digital Video production
- Final Cut Pro Editing Systems
- Motion graphics, compositing & editing
- Stock footage research & acquisition
- Compression and encoding for multimedia, web DVD & CD-ROM
- Digital Audio production and Sweetening
- DVD Development

Coastal Fog Productions can fully produce any project - from initial storyboard and shooting, to editing and preparation for distribution.

Our clients have been successfully using video presentations for:

- Advertising
- Trade shows
- Industry conferences
- Sales meetings
- Road shows
- Broadcast promotion
- Training
- and much more...

Put your video on DVD:

DVD is the fastest adopted technology ever. Help your audience see your products in the best possible quality. We'll compress your show and burn it to a DVD-R for optimal playback. We can also add a menu screens and buttons so you can skip through the video during playback.

Use video on your website:

Your website has unparalleled global reach and your audience can now access your company's customized message with a mouse click. If you already have a show and need it for web or CD use, we'll take care of the compression and make it ready for computer playback.
